

Topic in StartIT

- What skills we can enhance (three exemplary ones)
- When these skills are developed (in the project)
- Define indicators for the skills
- Define measuring method
- Questionnaires if needed

Selected soft skills (we should choose at least three, these are exemplary ones based on MIMI methodology):

- Empathy (developed during: teamwork, idea creation, presentation, communication in the team)
- Cooperation (developed during: teamwork, idea creation, communication in the team)
- Self-confidence (presentation, communication in the team, focusing on the goal)
- Stress management (teamwork, focusing on the goal)

Indicators and methods of measurement:

- Survey or KISS
 - o done twice during the project, at the beginning or before the event and at the end and after the event
 - o we can select reference group with similar competencies in a few participating partners
- Indicators on mentors' assessment over team work/persons in the team
 - o Group game play at the beginning
 - o And at the end, similar but different 10-15 minutes games
- Additional survey done each day indicating process and task done by the team/person.
